

SEALEGS®

BE AMPHIBIOUS

12RC

The 12RC is the biggest craft in the expansive Sealegs range.

Terrestrial power is provided by a 94hp inboard that's integrated seamlessly into the transom. The inboard powers the hydraulic pumps that drive the 12RC Cabin's three massive wheels.

On the water, the 12RC is powered by Twin Yamaha 425hp 5.6 litre V8 engines. The outboards ensure excellent performance and lots of torque propelling it to a top speed of 40 knots.

The 12RC's interior is customizable to customer requirements. Popular options being a galley with a diesel hob, under-bench fridge, drawers and storage, a raised dinette, and full height bi-fold doors aft. An electric cavity window behind the dinette opens the saloon to the cockpit, while sliding side windows and a pair of electric sunroofs ensures plenty of light and ventilation.

There is a huge cockpit suitable for a range of activities, including fishing, skiing, camping, over nighting, affectionately known as Sea glamping, and all important sun lounging.

Sealegs 12RC is just more. More comfort, more luxury and more freedom to explore the many beautiful places and adventures your coastline has to offer.
